## ABSTRACT

The Student Health Initiative is a joint initiative of the Canadian provincial government partners of Education, Health, Family, and Social Services; the Alberta Mental Health Board; the Child and Family Services Secretariat; and Community Development. The initiative is designed to strengthen the capacity to deliver health and related support services to children with special health needs registered in school programs. This document summarizes funding information and outlines student health initiative principles and joint service planning as well as annual reporting requirements. Part 1 describes the Student Health Initiative, including the purpose of the program, the principles for the program's operation, and the partnership. Part 2 outlines procedures for accessing funding and details eligible (and ineligible) service categories, types of eligible services, eligible service providers, eligible (and ineligible) costs. Part 3 details the required components of the joint service plan, development and submission procedures, support documents, and review and approval procedures. Part 4 describes the joint annual report, including the required components, development and submission procedures, and the review process. Six appendices include required components of the joint service plan, relevant forms, and acknowledgments. (KB)

## STUDENT HEALTH INITIATIVE PARTNERS

The Student Health Initiative announced on March 17, 1999 provides \$25.6 million annually to build strong partnerships that will strengthen our collective capacity to deliver health and related support services to children with special health needs registered in school programs.

Student Health is a joint initiative of the provincial government partners of Education, Health, Family and Social Services, the Alberta Mental Health Board (formerly the Provincial Mental Health Advisory Board), the Child and Family Services Secretariat, and Community Development.

On behalf of the provincial government partners we are pleased to provide you with the following information to assist in the successful implementation of the Student Health Initiative:

- list of the regional information sessions
- copy of the *Student Health Partnership Planning Guide: 1999/2000* (also available for downloading from the government partners' web sites, as noted on the inside cover)
- two-page funding information sheet
- list of the 1999/2000 government's student health initiative funding to be pooled in student health partnerships
- draft Matrix of Authority Boundaries to assist in the formation of the student health partnerships
- list of charter schools, private schools and private ECS operators to assist in the formation of the student health partnerships.

We are focusing government resources where they are most effective — at the community level. Those who work closely with the children and students must make the decisions.

We appreciate and look forward to your ongoing collaborative support to successfully enhance the access and delivery of integrated health and related support services for children with special health needs registered in school programs.

If you need further information, please do not hesitate to contact Mr. Brian Kearns, Student Health Initiative, Interim Project Manager at (780) 415-0085; toll-free in Alberta by dialling 310-0000 or e-mail [brian.kearns@gov.ab.ca](mailto:brian.kearns@gov.ab.ca).

# Message from the Partners

On behalf of the provincial government partners — Education, Health, Family and Social Services, the Alberta Mental Health Board (formerly the Provincial Mental Health Advisory Board), the Child and Family Services Secretariat, and Community Development — we are committed to looking for new and better ways of working together to plan and deliver coordinated services for children to enable them to achieve their potential.

*The Alberta Children's Initiative: An Agenda for Action* reflects the Government of Alberta's commitment to ensure Alberta's children are well cared for, safe, successful at learning and healthy. To achieve these goals, interdepartmental initiatives are being developed and implemented to support areas identified as immediate priorities, including Fetal Alcohol Syndrome, Protection of Children Involved in Prostitution, Children's Mental Health and Student Health.

The Student Health Initiative announced on March 17, 1999 provides \$25.6 million annually to build strong partnerships that will strengthen our collective capacity to deliver health and related support services to children with special health needs registered in school programs.

We are focusing government resources where they are most effective — at the community level. Those who work closely with the children and students must make the decisions.

We are pleased to provide this *Student Health Partnership Planning Guide* which provides a summary of funding information and outlines student health initiative principles and joint service planning and annual reporting requirements.

Our children are our future. We now invite you to share joint accountability to successfully enhance the access and delivery of integrated health and related support services for children with special health needs registered in school programs.

# 1. Student Health Initiative

## 1.1 BACKGROUND

The 1998–2001 *Government of Alberta Business Plan* includes a goal that government will “support communities in developing integrated or collaborative approaches to meeting the needs of children . . . and introduce health strategies to address priority health issues.”

Integrated service delivery is essential to support the healthy development of Alberta’s children. Integration at the community, regional and provincial levels means that children and families experience easy access to services and resources. In any given service or program, integration requires a combination of communication, cooperation, coordination and collaboration among service providers and government ministries.

To support the integration of services for children, the Child and Family Services Secretariat facilitated the development of the *Alberta Children’s Initiative: An Agenda for Joint Action*, identifying student health as one of the priorities. It is recognized that to ensure children are well cared for, safe, successful at learning and healthy, greater collaboration and coordination is required and all partners must be accountable for the successful achievement of these goals. These goals do not stand by themselves. Children will have educational success only if they are healthy, safe and well cared for.<sup>1</sup> Similarly, children can be considered healthy and well cared for, only if they are educated and safe.

The Student Health Initiative responds to needs identified in government-sponsored, inter-sectoral student health research projects conducted in 1996/1997 in the geographical areas of the Chinook, Mistahia, Aspen and Headwaters Regional Health Authorities. The project reports identify longstanding issues regarding the provision of student health services, such as insufficient funding, fragmented service delivery, multiple service providers, and the lack of mechanisms for joint planning, funding and accountability.

The Student Health Initiative also responds to the increased number of children in school with significant health needs, who require a range of health and related support services. Factors contributing to this include:

- increased survival rate of premature and low birth-weight infants
- better identification of health and learning problems related to maternal tobacco, drug and alcohol use
- improved medical technology and pharmaceuticals resulting in increased survival rates of high risk and medically fragile infants and children
- inclusion of children with significant special needs in local schools.

## 1.2 PURPOSE

Student Health is a joint initiative of the provincial government partners of Education, Health, Family and Social Services, the Alberta Mental Health Board (formerly Provincial Mental Health Advisory Board), and Child and Family Services Secretariat, with the recent addition of Community Development to facilitate the local planning process for student health services.

---

### **Children with Special Health Needs**

---

- ✓ have physical disabilities, developmental disabilities, neurological disorders, sensory impairments, medical conditions, and/or emotional/behavioural disabilities; **and**
  - ✓ are registered in school programs from Early Childhood Services (ECS) to Grade 12.
- 

The goal of the Student Health Initiative is to enhance the provision of a range of integrated health and related support services for children with special health needs registered in school programs and improve access to these services. The initiative will help ensure that children with special health needs are able to participate fully in their education programs and attain their potential.

In the Student Health Initiative, children with special health needs are those children who:

- have physical disabilities, developmental disabilities, neurological disorders, sensory impairments, medical conditions, and/or emotional/behavioural disabilities; **and**
- are registered in school programs from Early Childhood Services (ECS) to Grade 12.

---

### **Student Health Services**

---

- ✓ speech-language therapy
  - ✓ physical therapy
  - ✓ occupational therapy
  - ✓ audiology
  - ✓ respiratory therapy
  - ✓ nursing
  - ✓ emotional/ behavioural supports; e.g., psychological, social work and behavioural intervention
- 

Student health services include, but are not limited to:

- rehabilitation (speech-language therapy, physical therapy, occupational therapy, audiology and respiratory therapy)
- nursing
- emotional/behavioural supports; e.g., psychological, social work and behavioural intervention.

Students and children eligible to receive student health services are those who are registered in any of the following:

- public school program (provided by public or separate school jurisdictions, or charter schools)
- private school programs
- private ECS operator programs
- institutional education programs
- homebound programs and home schooling programs
- alternative programs, such as virtual, blended, outreach.

## **1.3 STUDENT HEALTH INITIATIVE PRINCIPLES**

The partners — Education, Health, Family and Social Services, the Alberta Mental Health Board, the Child and Family Services Secretariat, and Community Development — endorse the following principles to guide the planning, delivery and funding of student health services.

- Children with special health needs receive the health and related support services they need to benefit fully from their education programs and attain their potential.
- Children and families are involved in decisions regarding the provision of student health services.
- Student health services involve joint planning, collaboration and flexibility at all levels.
- Student health services are based on assessed needs and provided to achieve specific results.
- Alberta Education, Health, and Family and Social Services will ensure resources are available for student health services.
- Joint service plans at the local level must commit to continue existing expenditures for student health and show how new and existing resources are consolidated to provide student health services.
- Student health services are organized to make the most efficient and effective use of new and existing resources.
- School authorities, regional health authorities, regional offices of the Alberta Mental Health Board and child and family services authorities share accountability for student health services.

### **Student Health Partnership**

The student health partnership must include **at least one** partner from each of the following:

- school jurisdictions (public and separate)
- regional health authorities
- regional offices of the Alberta Mental Health Board
- child and family services authorities.

Note:

It is expected that other school authorities (charter schools, private schools, private ECS operators) will be part of a student health partnership.

## **1.4 STUDENT HEALTH PARTNERSHIP**

The Student Health Initiative supports communities in their efforts to build a network of support for children with special health needs registered in school programs.

Local service providers — school jurisdictions, regional health authorities, regional offices of the Alberta Mental Health Board and child and family services authorities — are expected to form a student health partnership and work together, with other relevant stakeholders, to develop a joint service plan.

It is expected that other school authorities (charter schools, private schools, private ECS operators) will be part of a student health partnership.

The joint service plan will outline local priorities and how the student health partnership plans to:

- improve the provision of integrated health and related support services for children with special health needs registered in school programs
- help ensure that children with special health needs are able to participate in their school programs and attain their potential.

To facilitate the initial formation of the student health partnership, it is expected that school jurisdictions will collaborate in taking the lead to bring together the partners. In order to develop and submit the joint service plan by no later than November 1, 1999 authorities should form a partnership as soon as possible.

## **2. Student Health Funding**

The Student Health Initiative will provide \$25.6 million annually to enhance the provision of a range of integrated student health services so children with special health needs are better able to learn at school.

This Student Health Initiative funding represents new government dollars and is separate from the education funding for students with special needs, which is currently provided to school authorities, as outlined in Alberta Education's *Funding Manual for School Authorities*.

## 2.1 ACCESSING STUDENT HEALTH FUNDING

In spring 1999, all partnering authorities will be notified as to the student health funding allocation which is available commencing September 1 of the 1999/2000 school year. For administrative efficiency Alberta Education, on behalf of the provincial government partners, allocates the student health funding to school authorities on a school year basis.

The student health funding allocation may only be accessed if partners join together and form a student health partnership. The funding must be pooled and used as a shared resource by the student health partnership to address priority student health needs. All partners need to be involved in decisions relating to the distribution of the pooled funding, based on the partnership's approved joint service plan.

Upon government's approval of the student health partnership's joint service plan (see pages 7–13 for more information on the plan), Alberta Education will release the student health funding allocation to the school jurisdiction designated by the student health partnership as the "banker" to receive and administer the funds allocated on behalf of the partnership.

Government approval of release of the student health funding is contingent upon the following conditions:

- commitment to use the new funding for health and related support services for children with special health needs registered in school programs
- commitment by all partners in the Student Health Initiative to maintain current levels of expenditures on student health services, with the flexibility for partners to allocate other funds to support integrated student health services
- consolidation of new and existing resources to improve the provision of student health services
- commitment by the student health partnership to annually report on the allocation of new and current funding for health and related support services, and achievement of results
- commitment by the student health partnership that any student health surplus funds are used for student health services only
- joint management of student health, at the local level, by the student health partnership based on the approved joint service plan.

## 2.2 ELIGIBLE HEALTH SERVICES AND COSTS

### Eligible Service Categories

- speech-language therapy
- physical therapy
- occupational therapy
- audiology
- respiratory therapy
- nursing
- emotional/behavioural supports; e.g., psychological, social work, behavioural intervention

### Types of Eligible Services

- assessment
- consultation
- program development
- direct therapy
- counselling for emotional/behavioural issues
- program implementation
- inservicing and supervision
- case conferencing
- service coordination
- referral and follow-up
- monitoring and evaluation
- family liaison
- services provided in the summer where identified as necessary in the student's education Individualized Program Plan

### Eligible Service Providers

- professional staff trained in a specific discipline; e.g., occupational therapist, social worker
- paraprofessionals trained in a specific field and working with many students under the direction of professional staff; e.g., speech-language aide
- teaching assistants working with students with special needs, under the direction of professional staff, and implementing program plans developed by professional staff

### Eligible Costs

- human resources (costs directly related to the delivery of student health services; i.e., salary/contract, employee benefits, travel, training). The service delivery component of the new student health funding can not include any administration costs.
- student health administration (costs associated with the administration of student health services such as secretarial support, accounting costs for the preparation and submission of all required forms, travel costs for partnership meetings, administration overhead)
  - Funding for the Student Health Initiative includes a component for administration costs equivalent to 4.5 per cent of the funding allocation. The administration funding is to be shared among all partners in the student health partnership. Any administration costs exceeding the 4.5 per cent allocation will be borne by the partnership.

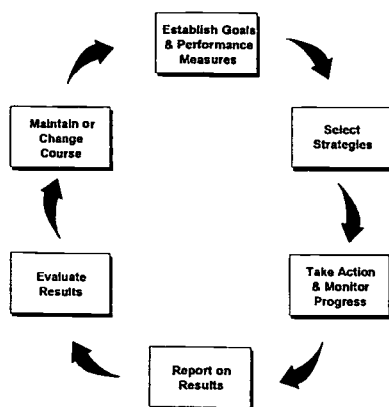

### Ineligible Service Categories

- population or public health services; e.g., immunization, dental health, reproductive health

### Ineligible Costs

- construction/purchase of land or buildings
- technical aids, adaptive equipment/devices for students
- school food programs
- child care costs
- transportation fees
- purchase/lease of vehicles

### Continuous Improvement Cycle

From *Achieving Accountability in Alberta's Health System*, by Alberta Health, November 1998. Reprinted with permission.

## 3. Joint Service Plan

Joint service planning and annual reporting occurs as a continuous improvement cycle.

### 3.1 REQUIRED COMPONENTS

The joint service plan must be a concise document of about 10 pages that is prepared collaboratively by the student health partnership and describes the way student health services will be delivered to the students in need.

**BEST COPY AVAILABLE**

---

### **Required Components of the Joint Service Plan**

---

1. Statement of Accountability
  2. Student Health Partnership Profile
  3. Student Health Needs
  4. Service Priorities
  5. Goals
  6. Performance Measures and Targets
  7. Strategies
  8. Financial Plan
- 

Approval of the joint service plan will be based on evidence of the student health partnership's commitment to the student health principles (outlined on page 3) and the following eight required components:

1. Statement of Accountability
2. Student Health Partnership Profile
3. Student Health Needs
4. Service Priorities
5. Goals
6. Performance Measures and Targets
7. Strategies
8. Financial Plan.

Appendix A, page 17 summarizes the required components.

### **Statement of Accountability**

The statement of accountability:

- is signed by the CEO or equivalent of each of the partners in the student health partnership (school jurisdiction, regional health authority, regional office of the Alberta Mental Health Board, and child and family services authority, and other school authorities – charter schools, private schools, and private ECS operators)
- confirms the accuracy of the information contained in the plan
- confirms the student health partnership's commitment to carry out the terms and conditions of the joint service plan to the best of the partnership's ability.

### **Student Health Partnership Profile**

The profile must include the:

- operating name of the student health partnership and mailing address
- identification of each partner involved in developing and implementing the joint service plan — school jurisdictions (public and separate), regional health authorities, regional offices of the Alberta Mental Health Board, child and family services authorities, and other school authorities (charter schools, private schools, and private ECS operators)
- identification of other relevant stakeholders in the student health partnership
- identification of the school jurisdiction which is designated as the recipient ("the banker") for the student health partnership's funding allocation
- vision and principles guiding the student health partnership

---

### **Freedom of Information and Protection of Privacy Act**

---

The FOIPP Act controls the manner in which personal information is collected, used and disclosed. The data submitted in the joint service plan are not intended to be personal information. Personal information is defined as recorded information about an identifiable individual.

---

---

### **Goals**

---

Two required goals are:

1. school-aged children with special health needs have access to a range of coordinated health and related support services to meet their needs
  2. school-aged children with special health needs are able to participate fully in their school programs and attain their potential.
- 

### **Student Health Needs**

The student health partnership must determine student health needs by identifying the:

- number of students assessed with mild/moderate disabling conditions or with severe disabling conditions
- critical risks and needs based on an analysis of the current caseload
- service gaps
- current level of expenditures on student health services by each of the partners
- number of students who received student health services during the 1998/1999 school year
- student health and related support service needs which have not been met.

### **Service Priorities**

The service priorities, based on an assessment of student health needs and service gaps, must identify:

- which needs, within the range of student health services, will be addressed in the initial plan
- the essential characteristics of the service delivery model; e.g., a coordinated approach to service delivery with strong partnerships and stakeholder consultation in determining priorities.

### **Goals**

The goals are broad statements of desired results or what the student health partnership wants to accomplish. At a minimum, two required goals are:

1. school-aged children with special health needs have access to a range of coordinated health and related support services to meet their needs
2. school-aged children with special health needs are able to participate fully in their school programs and attain their potential.

Additional goals should be identified to address service priorities and student health needs specific to the student health partnership.

---

## **Performance Measures**

---

Two required performance measures are:

1. percentage of students with special health needs who are provided services
  2. number of students who achieve the goals of their education Individualized Program Plans (IPPs).
- 

## **Performance Measures and Targets**

The performance measures provide information about the achievement of goals. Targets identify the performance measure levels that are expected to be achieved within the 1999/2000 school year and as a part of the continuous three-year planning cycle.

In the 1999/2000 school year, two required performance measures and targets (outputs) are:

1. percentage of students with special health needs who are provided services, with a target of an increase in the percentage of students served
2. number of students who achieve the goals of their education Individualized Program Plans (IPPs), with a target of an increase in the number of students who achieve the goals of their IPPs.

The student health partnership may develop additional performance measures to address outcomes such as:

- access to a range of services
- continuous quality improvement of best practices
- improvement of overall educational achievement
- stakeholder satisfaction
- improved coordination of services across stakeholders.

All identified performance measures should have targets. For example, if the performance measure is “to determine the parents’ ratings of the quality of student health services their children received,” the target might be that 90 per cent of the parents rate the services their children received as being good or excellent.

## **Strategies**

The strategies are broad descriptions of actions to accomplish short to medium-term (one to three years) goals of the student health partnership. Strategies should be achievable within available resources, and address identified needs, issues and areas for improvement.

To address the delivery of services, strategies must identify how the student health partnership will result in:

- improved access to a range of coordinated student health services
- better coordination of student health services for children registered in school programs.

---

## **Strategies**

---

Strategies must identify how the student health partnership will result in:

- improved access to a range of coordinated student health services
  - better coordination of student health services for children registered in school programs.
-

In addition to strategies to deliver student health services, it is anticipated that, in the initial school year of 1999/2000, the emphasis will be on developing processes needed to successfully manage student health service delivery and planning. Therefore, initial strategies must address the:

- development of partnerships, including decision-making processes and reporting mechanisms
- assessment of needs and current resources
- establishment of consultation processes with communities, families and other service providers
- development of processes for monitoring and evaluation, and management and information systems
- development of dispute resolution processes.

### **Financial Plan**

The financial plan must be submitted with the joint service plan and demonstrate accountability by reporting costs for student health service delivery.

The financial plan must include completed Forms 1 and 2 (Appendices B and C, pages 18 and 19). These forms may be supplemented with any additional information that strengthens the linkage between financial information and the joint service plan.

Please note: 

Prior to filling out Forms 1 and 2, it is important to note the following.

- \* Students who receive more than one student health service should be reported under each eligible service category.
- \* Teaching assistants are a unique service provider group. Since teaching assistants may spend only a portion of their time providing student health services, school authorities may wish to estimate their costs by using a percentage. The suggested guide is that 25 per cent of a teaching assistant's time is spent providing health and related support services to students with special health needs in the classroom. For future reporting purposes, and based on actual expenditures during the 1999/2000 school year, the partnership must determine if the estimated percentage accurately reflects the portion of teaching assistant time spent on providing student health services.

### **Form 1: Student Health Services Financial Planning Report**

- Each partner (as defined on page 4) must complete and submit this form with the joint service plan.
- The form provides data on the estimated student health service delivery costs for the 1998/1999 school year for those students who are registered in school programs in the student health partnership. See Appendix B, page 18 for the form.

### **Form 2: Student Health Partnership Consolidated Financial Planning Report**

- The student health partnership must complete and submit this form with the joint service plan.
- The form consolidates the information reported by each partner on Form 1.
- It provides a summary of the estimated student health service delivery costs for the 1998/1999 school year and projected student health service delivery costs for the 1999/2000 school year.
- The form provides a reconciliation of the funding sources to be used by the student health partnership to cover the projected student health service delivery costs for the 1999/2000 school year.
- Surpluses can be carried forward to the next school year, but deficits are not permitted. See Appendix C, page 19 for the form.

## **3.2 DEVELOPMENT AND SUBMISSION**

The joint service plan is developed for the 1999/2000 school year (September 1 to August 31) and also should broadly reflect a three-year planning cycle to August 31, 2002.

The 1999/2000 joint service plan will emphasize the early stages of the continuous improvement cycle; i.e., establish goals and performance measures, select strategies, take actions.

As the joint service plan is developed for each new school year, progress relating to actions will be monitored, results will be reported and evaluated, and areas for continuous improvement will be identified by the student health partnership.

The joint service plan needs to be submitted to the Student Health Initiative project manager **by November 1, 1999**. The joint service plan must include the eight required components. Omission of any of these may result in a delay in the approval process.

#### **Joint Service Plan Due Date**

---

- Year 1: **November 1, 1999**
  - Future: May 31
-

A joint service plan submitted by **July 1, 1999** will allow for review and approval by partnering ministries and the release of the funds for September 1999.

Any student health partnership that submits a joint service plan after November 1, 1999 can not be guaranteed the full funding allocation for the 1999/2000 school year.

All subsequent joint service plans are due by **May 31**.

### 3.3 SUPPORT TO STUDENT HEALTH PARTNERSHIP

The development of joint service plans is being supported in the following ways.

- Six information meetings about the Student Health Initiative will be held throughout the province in April 1999.
- Staff from Alberta Community Development are available, upon request, to assist as facilitators during the development process. See Appendix D, page 20, for a list of contacts.
- The Student Health Initiative project manager is available to provide further information and support. (See sidebar.)

---

Student Health Initiative  
Project Manager  
Telephone: (780) 422-6326  
Fax: (780) 422-2039  
Toll-free in Alberta  
by dialing 310-0000.

---

### 3.4 REVIEW AND APPROVAL

The review and approval of the joint service plan will be conducted by the provincial government partners — Education, Health, Family and Social Services, the Alberta Mental Health Board, the Child and Family Services Secretariat, and Community Development.

The joint service plan will be reviewed and approved on the basis of:

- the eight required components, outlined on pages 7–12 and summarized in Appendix A, page 17
- evidence of the student health partnership's commitment to the student health principles, outlined on page 3.

Approval of the joint service plan will be communicated in writing to the student health partnership within six weeks of submission.

Upon government approval of the plan, the funding allocation will be provided to the partnership.

## 4. Joint Annual Report

Joint service planning and annual reporting occurs as a continuous improvement cycle.

### 4.1 REQUIRED COMPONENTS

---

#### Required Components of the Joint Annual Report

---

- ✓ Statement of Accountability
  - ✓ Major Accomplishments
  - ✓ Progress Report
  - ✓ Results Report
  - ✓ Continuous Improvement Report
  - ✓ Financial Summary
- 

The joint annual report is prepared for the 1999/2000 school year and must include the following required components:

- Statement of Accountability
- Major Accomplishments
- Progress Report
- Results Report
- Continuous Improvement Report
- Financial Summary.

#### Statement of Accountability

The statement of accountability is:

- signed by the designated representative on behalf of the student health partnership
- confirms the accuracy of the information contained in the report
- confirms the student health partnership's commitment to take actions for continuous improvement, based on the evaluation of results; i.e., where the results do not meet the partnership's expectations
- confirms the student health partnership's commitment to use the new funding for health and related support services only.

#### Major Accomplishments

The major accomplishments briefly highlight and summarize the achievements of the student health partnership, including achievements in relation to the student health principles, outlined on page 3.

#### Progress Report

This report focuses on progress in the areas of service priorities, achievement of goals and implementation of strategies specific to the joint service plan.

## Results Report

The results report includes monitoring, evaluation and reporting on all performance measures.

Analysis of the results should identify whether the results were satisfactory, exceeded expectations and/or need improvement. The analysis also should explain any variance between planned and actual achievements.

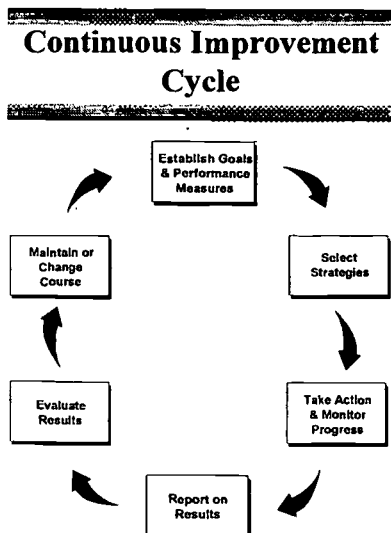

The results report must include the following data on the number of students who benefited from the Student Health Initiative funding:

- the percentage of students who received more than one student health service
- the percentage of resources allocated to students in ECS–Grade 4 and those in Grades 5–12.

To update data for the student health funding allocation, each school authority (public and separate school jurisdictions, charter schools, private schools, and private ECS operators) in the student health partnership must submit the following information, based on Alberta Education's special education definitions, for the 1999/2000 school year:

1. number of students\* with mild/moderate disabilities who received student health services
2. number of students\* with severe disabilities who received student health services
3. number of students\* in the general student population not identified as having disabilities who received student health services.

\* **Note:** Students must be counted only once, regardless of the number of types of student health services they received.

From *Achieving Accountability in Alberta's Health System*, by Alberta Health, November 1998. Reprinted with permission.

## Continuous Improvement Report

The continuous improvement report identifies opportunities to further enhance access to and coordination of services, as well as describes emerging issues or needs to be addressed in the next joint service plan.

**BEST COPY AVAILABLE**

### Financial Summary

The financial summary must include **Form 3: Student Health Partnership Consolidated Annual Financial Report**

- The student health partnership must complete and submit this form with the joint annual report.
- This form includes the actual costs of student health service delivery for the 1999/2000 school year and identifies any surplus based on expenditures. See Appendix E, page 21, for the form.

---

#### Joint Annual Report Due Date

---

- Year 1: November 1, 2000
  - Future: November 1
- 

## 4.2 DEVELOPMENT AND SUBMISSION

The student health partnership must submit, by **November 1, 2000** a joint annual report to the Student Health Initiative 11160 Jasper Avenue, Edmonton, Alberta, T5K 0L2.

## 4.3 REVIEW

The provincial government partners — Education, Health, Family and Social Services, the Alberta Mental Health Board, the Child and Family Services Secretariat and Community Development — will review each joint annual report.

The partnering provincial government departments will consolidate the information resulting from each joint annual report review and will share the best practices at the Annual Children's Forum and in the *Alberta Children's Initiative Annual Report*.

## Required Components of the Joint Service Plan

### Statement of Accountability

- ☐ Signed by CEO or equivalent of each partner.
- ☐ Information in the joint service plan is accurate.
- ☐ Student health partnership is committed to carry out the terms and conditions of the joint service plan.

### Student Health Partnership Profile

- ☐ Operating name of the student health partnership and mailing address.
- ☐ List of each of the partners - school jurisdictions, regional health authorities, regional offices of the Alberta Mental Health Board, child and family services authorities, and other school authorities (charter, private, private ECS operators).
- ☐ List of any other relevant stakeholders.
- ☐ Identify the school jurisdiction designated to receive the funds on behalf of the partnership.
- ☐ Vision and principles guiding the student health partnership.

### Student Health Needs

- ☐ Number of students assessed with mild/moderate/severe disabling conditions.
- ☐ Critical risks and needs.
- ☐ Service gaps.
- ☐ Current level of expenditures on student health services by each of the partners.
- ☐ Number of students receiving student health services during the 1998/1999 school year.
- ☐ Student health and related support service needs which have not been met.

### Service Priorities

- ☐ Based on an assessment of student health needs and service gaps.
- ☐ Identify which needs, within the range of student health services, will be addressed in the initial joint service plan.
- ☐ Identify the essential characteristics of the service delivery model; e.g., a coordinated approach to service delivery with strong partnerships.

### Goals

- ☐ At a minimum, two required goals are:
  1. school-aged children with special health needs have access to a range of coordinated health and related support services to meet their needs
  2. school-aged children with special health needs are able to participate fully in their education programs and attain their potential.
- ☐ Additional goals to address service priorities and student health needs.

### Performance Measures and Targets

- ☐ The two required performance measures and targets (outputs) are:
  1. percentage of students with special health needs who are provided services, with a target of an increase in the percentage of students served
  2. number of students who achieve the goals in their Individualized Program Plans (IPPs), with a target of an increase in the number of students who achieve the goals in their IPPs.
- ☐ Identify additional performance measures and targets.

### Strategies

- ☐ To address the delivery of services, strategies must identify how the student health partnership will result in:
  1. improved access to a range of coordinated student health services
  2. better coordination of student health services for children registered in school programs.
- ☐ Additional strategies that are achievable within available resources, and address the identified needs, issues and areas for improvement.

### Financial Plan

- ☐ Completed Forms 1 and 2.
- ☐ Any additional financial information.
- ☐ Submit with the joint service plan.

# STUDENT HEALTH INITIATIVE FUNDING

## FUNDING PRINCIPLES

- All partners in the student health partnership must maintain current levels of expenditures on student health services. All partners can allocate other funds to support integrated student health services.
- The student health initiative partnership must use the student health funding for health and related support services for children with special health needs registered in school programs.
- The student health partnership must consolidate new and existing resources to enhance the provision of student health services.
- The student health partnership is accountable for joint management of student health, at the local level, based on the approved joint service plan.
- The student health partnership will be allowed to retain any student health surplus funds; however, these funds must be used for student health services.
- The student health partnership must annually report on the allocation of new and current funding for health and related support services, and achievement of results.
- All partners need to be involved in decisions relating to the distribution of the pooled funding, based on the partnership's approved joint service plan.
- The formation of a student health partnership is key to the success of the Student Health Initiative and must include at least one of each of the regional authority partners — school jurisdiction (public or separate), regional health authority, regional office of the Alberta Mental Health Board, and child and family services authority. It is expected that other school authorities (charter schools, private schools, private ECS operators) will be part of a student health partnership.
- In the initial formation of the student health partnership, it is expected that school jurisdictions will collaborate in taking the lead to bring together all partners.
- Upon government's approval of the student health partnership's joint service plan, Alberta Education will release the student health funding allocation. The allocation will be released to the school jurisdiction designated by the student health partnership as the "banker" to receive and administer the funds allocated on behalf of the partnership.

## FUNDING PARAMETERS

- Funding for student health services is provided to help ensure that children with special health needs registered in school programs are able to participate fully in their education programs and attain their potential.
- Funding commences in September of the 1999/2000 school year and is allocated on a school year basis.
- School authorities, regional health authorities, the Provincial Mental Health Advisory Board, and child and family services authorities are informed each spring of the government's student health funding to be pooled in student health partnerships.
- The funding allocation model (see page 2) is based on funded children/students in ECS to Grade 12 and is used as a method to allocate the funds to school authorities.
- The student health funding allocation can only be accessed by a student health partnership. The funding must be pooled and used as a shared resource by the student health partnership to address priority student health needs.

## FUNDING ACCOUNTABILITY

- As outlined in the *Student Health Partnership Planning Guide: 1999/2000*, the student health partnership must develop and submit for approval an annual joint service plan which includes eight components:
  - Statement of Accountability
  - Student Health Partnership Profile
  - Student Health Needs
  - Service Priorities
  - Goals
  - Performance Measures and Targets
  - Strategies
  - Financial Plan.
- As outlined in the *Student Health Partnership Planning Guide: 1999/2000*, the student health partnership must submit for review a joint annual report, by November 1, 2000 for the 1999/2000 school year.

# STUDENT HEALTH INITIATIVE FUNDING ALLOCATION MODEL

## RATIONALE AND WEIGHTING FACTORS

- The purpose of the Student Health funding is to help fill in the "gaps" and supplement funding currently provided to the joint partners at the local level. Since there is currently no data available, which specifically identifies student health needs, the model distributes the funding based on estimates of students who require student health services.
- As more accurate data becomes available through the joint service plans and annual reports, the funding allocation model will be modified to more accurately distribute the student health funding to where the needs are identified.
- The funding model is based on the understanding that most students who require student health services are those with disabilities. The model approximates the number of students who require student health services by combining the numbers of students with disabilities with a portion of the general student population who also require student health services.
- Students with mild/moderate disabilities are weighted at 2x and students with severe disabilities are weighted at 4x. These weightings are based on similar weightings used in Education funding (i.e., mild/moderate students are funded at approximately two times the level of regular students and severe students are funded at approximately four times the level of regular students).
- It is estimated that in addition to students with disabilities, approximately 5 per cent of the general student population may require student health services. The ECS – Gr. 4 enrolment population is weighted at 2x to give emphasis to early intervention.
- The joint partners at the local level will decide how the funding will be utilized. The joint partners are in no way obligated to allocate the funding in the same manner in which it is received. Therefore, the joint partners' allocation of funds to the various student groups (i.e., mild, moderate, severe and general enrolment) may not be the same as that reflected in the allocation model.

0054	Wolf Creek Regional Division No. 72	\$ 486,119	\$ 21,875	\$ 507,994
	<b>SCHOOL JURISDICTION TOTALS</b>	<b>\$ 22,866,528</b>	<b>\$ 1,028,994</b>	<b>\$ 23,895,521</b>
	<b>*Private Schools, Private ECS Operators, Charter Schools</b>	<b>\$ 1,433,445</b>	<b>\$ 64,505</b>	<b>\$ 1,497,950</b>
	<b>GRAND TOTAL</b>	<b>\$ 24,299,972</b>	<b>\$ 1,093,499</b>	<b>\$ 25,393,471</b>
These amounts are estimates based on 1998-99 data as of March 26, 1999. Funds distributed may differ slightly based on final 1998-99 data. These funds may only be accessed by joining an eligible Student Health Partnership.				
*As private schools, private ECS operators, and charter schools join a student health partnership, these funds will be proportionately added to the pool for the partnership.				
The school authorities' Student Health Funding amount was determined by taking the total outlined in the funding model and dividing it into the provincial total to express it as a percentage of the provincial total, then multiplying this percentage by the total budget allocation (\$24,300,000). Administration funding is 4.5% of the Student Health Funding amount.
